EDUCATION

Bachelors of Science, Software Engineering

University of Management and Technology

09/2022 - Present

Lahore, Pakistan

PROJECTS

Portfolio (04/2025 - 04/2025)

- I created a personal portfolio website using HTML, Tailwind CSS, and JavaScript. I applied frontend development skills to design and build this project. The website presents my skills, background, and contact information in a clean, responsive layout to help visitors learn more about me.

AI Recipe Finder (03/2025 - 04/2025)

- Built an AI Recipe Finder web app using Flask for the backend and SQLAlchemy for database management. I applied web development and API integration skills to create this project. The app allows users to enter ingredients, and it uses the Gemini API to generate recipe suggestions. It displays relevant recipes along with step-by-step cooking instructions to help users prepare meals easily.

Quizzy App (12/2024 - 02/2025)

- Developed a cross-platform quiz app that dynamically generates quizzes based on user input using the OpenAI API. Implemented features for topic selection, question generation, and score calculation. Built with Flutter as part of a university mobile app development course.

Amazon Web Page Recreation (04/2024 - 04/2024)

- I made a web page just like Amazon's, using easy web design tools called HTML and CSS. It's not ready for phones yet, but it works great on computers. I learned a lot from a web design class and used that knowledge to make this page. It's a big step for me in learning how to build websites, and I'm really proud of it. I hope you like it as much as I enjoyed making it!

Social Links Page (03/2024 - 03/2024)

- During my Full Stack Development journey, I created a set of social media buttons using HTML and CSS. Although they currently serve their purpose, I am committed to making them even better. This project represents a significant step in my path toward becoming a skilled web developer. I take pride in my work and am eager to learn and grow

WORK EXPERIENCE

Next JS Developer Intern Devsinn Technologies

08/2025 - Present

Lahore, Pakistan

SKILLS

Machine Learning
