PROFILE

Software Engineering graduate with hands-on internship experience at 10Pearls Pakistan and Devsinn Technologies. Proficient in building production-ready RESTful APIs with ASP.NET Core (self-taught), JWT authentication, EF Core, and Repository Pattern. Experienced in full-stack development using the MERN stack and Next.js, with a growing focus on AI-driven applications. Passionate about writing clean, scalable, and maintainable code.

WORK EXPERIENCE

10Pearls Pakistan — MERN Stack Developer Intern

Sep 2025 – Dec 2025 | Lahore

- Developed a full-stack MERN application with 5+ core modules serving real client requirements
- Integrated 10+ RESTful API endpoints using Node.js and Express.js connected to MongoDB
- Reduced bug count by 30% through systematic testing, debugging, and peer code reviews
- Collaborated with a cross-functional team using Git workflows and agile development practices

Devsinn Technologies — Next.js Developer Intern

Aug 2025 – Sep 2025 | Lahore

- Worked on 4+ real client projects, building responsive frontends using Next.js and Tailwind CSS
- Integrated REST APIs and optimized frontend performance for client-facing applications
- Delivered UI improvements that went live in production within the internship period

PROJECTS

CyberSentinel - AI-Powered Cybersecurity Monitoring System (Final Year Project)

- Developing an end-to-end AI-powered cybersecurity monitoring system with a FastAPI backend, Flutter frontend, and Supabase.
- Implemented a hybrid intrusion detection engine using Random Forest (trained on the CICIDS2017 dataset) alongside Isolation Forest and K-Means for anomaly detection on Windows firewall logs.
- Built secure RESTful APIs for threat detection, security event processing, threat intelligence integration, and incident management.
- Designed and developed a responsive Flutter-based Security Operations Center (SOC) dashboard for real-time visualization of alerts, threat scores, network activity, and security analytics.

ClinicOS

- Designed and developed a role-based clinic management system for a local clinic in Lahore using ASP.NET Core and Next.js.
- Implemented Admin, Doctor, and Receptionist roles with dedicated dashboards and role-based permissions.
- Integrated RTK Query for efficient API communication and frontend state management.
- Built a responsive UI with Tailwind CSS v4, including workflows for patient records, appointments, and scheduling.

Drafidox — AI-Powered Document, Image & Text Conversion Platform

- Redesigned and rebuilt the frontend of a 20+ tool SaaS platform (OCR, PDF to Word, Image to Text, File Compressor etc.) using Next.js and TypeScript
- Integrated the platform's in-house backend APIs to power core conversion workflows, handling async requests, loading, and error states on the client side
- Built a consistent, reusable component system across converter, preview, and editor pages for a unified UX

Website URL: <https://drafidox.com/>

Eclore - Luxury Streetwear E-Commerce Platform

- Built and deployed a production e-commerce storefront for a luxury streetwear brand using Next.js 15, TypeScript, and Tailwind CSS, serving live customers with Cash-on-Delivery checkout
- Engineered 18+ reusable React components including product catalog, dynamic cart drawer, category filtering, and carousels
- Optimized SEO with JSON-LD structured data, dynamic sitemap generation, and Open Graph meta tags — achieved indexed visibility on Google Search
- Deployed on Vercel with Speed Insights and a fully responsive, mobile-first design

Website URL: <https://www.ecloraofficial.store/>

Umazing - Mobile Accessories E-Commerce Storefront

- Developed a visually polished, mobile-first storefront UI for a mobile accessories brand using Next.js and Tailwind CSS
- Created reusable product card, gallery, and filtering components to display 15+ SKUs across multiple categories
- Designed a stock-status system (in-stock/out-of-stock) and category navigation for smooth browsing experience
- Implemented SEO-optimized metadata and social sharing tags to improve discoverability

Website URL: <https://www.umazing.shop/>

Inkwell - Notes Tracking App

- Built full-stack notes tracking application with end-to-end CRUD using Node.js, Express.js, and MongoDB
- Implemented JWT authentication, bcrypt password hashing, and RESTful API design

Website URL: <https://inkwellnotesapp.vercel.app/>

Job Tracker — Full-Stack Task Management System

- Built a production-grade Task Management API using ASP.NET Core, C#, and EF Core, with a Next.js and Shadcn UI frontend
- Implemented JWT authentication, Repository Pattern, and AutoMapper for clean, maintainable architecture
- Secured user data with BCrypt password hashing and role-based access control
- Designed and integrated SQL Server database with EF Core migrations for data persistence

Github URL: <https://github.com/hammad-umt/job-tracker-api>

EDUCATION

University of Management and Technology (UMT)

Nov 2022 – July 2026

Bachelor of Science in Software Engineering — Lahore, Pakistan

TECHNICAL SKILLS

Backend: ASP.NET Core Web API, C#, Node.js, Express.js, Python, ASP.NET Core

Frontend: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Shadcn UI, HTML/CSS

Database: SQL Server, Entity Framework Core, MongoDB, SQLite

Tools: Git, GitHub, Postman, Swagger, Visual Studio, VS Code, Vercel, Netlify

Concepts: REST APIs, JWT Authentication, Repository Pattern, Clean Architecture, CI/CD

Mobile: Flutter

CERTIFICATES

Programming with JavaScript • Introduction to Frontend Development • Python Basics • Version Control • Python Classes & Inheritance • Microsoft Full-Stack Developer Professional Certificate (Coursera)
